ASSO P2P ENERGY INTELLIGENCE PLATFORM - Enterprise Overview

=====

PROBLEM

11.5p/kWh average spread between surplus solar generation and peak demand goes unmonetised by UK/EU utility providers today.
DSO/BSP intermediaries capture value that belongs to the provider.

SOLUTION: Intelligent Energy Routing Layer

Sits between your grid, your customers, and the wholesale market.
Captures the spread. White-label. No grid modification required.

ECONOMICS (per 5,000 customers)

Annual new revenue potential: GBP 24,000 - 48,000
Deployment timeline: 10 weeks from contract to white-label live

"Others rent the infrastructure. Asso transfers it."

ARCHITECTURE

- Intelligent routing layer (API-first, EMS/SCADA-compatible)
- HMAC settlement engine (audit trail per transaction)
- Regulatory compliance module (OFGEM, EU RED III ready)
- Real-time analytics dashboard (white-label)

LICENSING TIERS

1. SaaS Licence - Monthly per-node subscription
2. White-Label - Full branded platform on your infrastructure
3. IP Transfer - Complete codebase acquisition
